

BOURDON
The Original by Baumer

Main Features

- Pressure range from 160 mbar to 160 bar
- Temperature -60 °C ... 200 °C
- Class 150 to 900
- NPS 1/2" to 2"1/2
- PN10 to PN160
- DN10 to DN65

Applications

- Oil & Gas / Chemical
- Water / Waste water
- Energy
- Process technic

Technical Data

This diaphragm seals with flanged process connection are used to protect pressure gauges from high temperatures, aggressive or corrosive fluids.

The design of the process flange allows direct mounting on standardized flange connections of pipes or tanks.

Different diaphragm materials can be selected to adapt the seal to various applications and process fluids.

The diaphragm seals can be mounted to pressure gauges or pressure switches directly or with a flexible capillary. For use with electronic transmitters for pressure and differential pressure the product series D9xx is recommended, especially for low pressure ranges.

The filling fluid of the measuring system has to be chosen compatible to the application.

Min.pressure ranges	See table on page 2
Temperature	-60 °C ... +200 °C ¹⁾
Filling liquids	LRS1: -15 °C ... +150 °C LRS9: -40 °C ... +200 °C high temperature oil Other liquids on request
Mounting	Direct
Process flange	Stainless steel 1.4404 (AISI 316L) ¹⁾
Flange types	ASME B16.5 / EN1759-1: class 150 to 900, NPS 1/2" to 2"1/2 EN1092-1: PN 10 to 160, DN 10 to 65. Available flange faces see table on page 4. Other flange types on request.
Diaphragm	Stainless steel 1.4435 (AISI 316L) Option: Hastelloy, Uranus, Tantalum and Monel 400 (see ordering details on page 5)
Maximum pressure	According to the PN or the class of the flange and its standardized pressure temperature relation

¹⁾For temperatures up to 400 °C please use the series D418 and D438

Materials

	N°	D415	D425	D435
Upper part	①	Stainless steel 1.4404		
Process flange	②	Stainless steel 1.4404 ¹⁾		
Diaphragm	③	Stainless steel 1.4435 ¹⁾		
Gasket	④	PTFE		
Fixing flange ³⁾	⑤	Stainless steel 1.4301 ²⁾	— ⁴⁾	
Screws	⑥	Stainless steel 1.4301 ²⁾		

¹⁾ Others materials see ordering details on page 5

²⁾ 1.4404 (316L) with option 1999

³⁾ Stamped parts for D415 and D425

⁴⁾ The upper part of the D435 is a flange directly mounted on the process flange

Dimensions (mm)

Pressure limitations and dimensions of the upper part

Type	Min. pressure ranges ¹⁾		P _{max} ²⁾	Ø B
	Gauge	Compound		
D415	0 ... 10 bar	-1 ... 9 bar	160 bar	85
D425	0 ... 1 bar	-1 ... 3 bar	40 bar	85
D435	0 ... 0.16 bar	-1 ... 0 bar	25 bar	120

¹⁾ Fluid temperature -20 ... 100 °C, ambient temperature -10 ... 50 °C for pressure gauges DN100/150/160, others on request.

²⁾ The maximum pressure is also limited by the process flange.
